MINOR IN MATHEMATICS (17-19 CREDIT HOURS)

Mathematics is a group of related subjects that concern the study of numbers, geometry, shapes, space, and patterns, and their inter-relationships, applications, generalizations, and abstractions. After centuries of evolution, it has become a body of knowledge that intersects with logic and philosophy and effectively describes natural, social, and technological processes.

Although thinking mathematically is considered difficult by most students, everyone is born with a mathematical ability. The minor in mathematics is designed to enable a student with a significant interest in mathematics to deepen his/her knowledge while pursuing a concentration in another field. The minor in mathematics, which is administered by the Department of Mathematics and Natural Sciences, will broaden students' understanding and application of mathematical concepts to their chosen field of study. The wide range of courses available makes it attractive to students who wish to become more mathematically literate.

LEARNING OUTCOMES FOR THE MATHEMATICS MINOR

Upon completion of the minor in mathematics, students will be able to:

1. Demonstrate a working knowledge of selected topics from calculus, linear algebra, and a distribution of other branches of mathematics.
2. Use mathematics to analyze mathematical problem situations, to make decisions, and to verify results.
3. Use computational tools effectively and apply mathematics to several fields.
4. Demonstrate the ability to communicate mathematical ideas clearly.

PROGRAM REQUIREMENTS

To satisfy the 18 credits required for a minor at least 9 credit hours must be taken at AUK. A cumulative GPA of at least 2.00 in the minor requirements is needed to successfully complete the mathematics minor program.

MINOR IN THE NATURAL SCIENCES [BIOLOGY, CHEMISTRY, PHYSICS] (21 CREDIT HOURS)

Natural sciences are deeply involved in the activities that are essential to our modern civilization. The breadth of the natural sciences reflects the blurring of boundaries between the different sciences: biological problems are increasingly being solved using techniques that require an understanding of physics and chemistry, while many of the most pressing problems being addressed by chemists and environmental scientists require knowledge of physics and biology.

The mission of the natural sciences program is the development of literacy in the concepts, goals, and methods of a variety of science disciplines (fields of study) by offering courses in biology, chemistry, and physics. Students choose between a curriculum that stresses a solid knowledgebase in biology, and a curriculum that emphasizes the physical or chemical sciences with less intense coverage of biology. Students can expect to deepen their knowledge through hands-on laboratory investigations, and to develop observational and experimental skills. Students will develop critical thinking skills and a more detailed understanding of scientific concepts and methods through completion of a minor in natural sciences.

The broad flexibility of the program is intended to accommodate the needs and goals of students who wish to pursue a career in natural sciences as well as the needs of students who are taking courses in business, English literature, computer science, history and international relations, and other disciplines. The minor in natural sciences which is administered by the Department of Mathematics and Natural Sciences, combined with any major in liberal arts, prepares students for further studies and helps them in future employment in biology, physics, chemistry, medicine and allied health fields, engineering, bioinformatics, and environment management. Science-based career opportunities are widely distributed among business, industry, journalism, government, and education.

A minor in natural sciences requires the completion of 21 credit hours of coursework in natural sciences. The 7 credit hours of science courses taken under the general education requirements can be used toward fulfilling the minor requirements.

LEARNING OUTCOMES

Students who successfully complete the natural sciences minor will be able to:

1. Demonstrate knowledge and understanding of the major concepts and principles in biology, chemistry, or physics according to the levels of courses completed in each subject area.
2. Demonstrate problem-solving abilities and apply scientific methods to investigate the natural world.
3. Synthesize a convincing argument in the language of science.
4. Acquire adequate preparation for careers in natural sciences and/or be admitted to and be successful in professional programs.

PROGRAM REQUIREMENTS

At least 9 credit hours must be taken at AUK.

A cumulative GPA of at least 2.00 in the minor requirements is needed to successfully complete the natural sciences minor program.

DEPARTMENT OF INTERNATIONAL RELATIONS

The international relations program seeks to educate students through a traditional liberal arts and interdisciplinary curriculum. The program is committed to teaching skills in critical and perspectival thinking, problem-solving, communication, research, teamwork, and communication technology.

The program is structured with a set of general core course requirements which students should complete by the beginning of their junior year. Additionally, students take courses in three of the IR fields in which the student chooses to concentrate (diplomacy and conflict resolution, international law and organizations, international political economy, international relations, and history). Finally, in consultation with their advisor, students select courses as international relations electives.

The program is ideal for those who want to pursue careers in diplomacy, media, local and national government, and international and non-governmental organizations. It is also an excellent stepping-stone toward graduate programs in international relations, history, political science, public administration, law, and business. It is strongly recommended that a student majoring in international relations also minor in history or Arabic.

Students may select, with the approval of their advisor, special topic courses in either history (HIST 389) or international relations (IR 389) or American studies (AMST 389) to fulfill field concentration requirements.

Diplomacy and Conflict Resolution

Students pursuing the concentration in diplomacy and conflict resolution study the evolution of international diplomacy and conflict resolution and examine the practices of bilateral and multilateral diplomacy, coercive diplomacy, preventive diplomacy and the efforts of conflict resolution ('track two diplomacy', mediation, negotiation, and facilitation). This concentration endeavors to go beyond traditional conceptions of diplomacy (i.e. as the preserve of states) and conflict resolution by investigating the emergence and activities of new actors, such as non-governmental organizations (NGOs), multinational corporations, armed groups, international experts and technocrats, and private citizens. Also, students taking the concentration are exposed to the complex relationship between religion and diplomacy, conflict management, prevention, and resolution. The learning goals are obtained through course readings, class discussion, case studies, papers, article reviews, presentations, internships, and exams.

Students who complete the diplomacy and conflict resolution track will be able to:

1. Demonstrate knowledge of diplomacy and conflict resolution theory, including bilateral and multilateral diplomacy, preventive diplomacy, coercive diplomacy, and non-state diplomatic practice (NGOs, corporations, armed groups, etc.) including 'track two' diplomacy, conflict management, prevention and resolution.
2. Relate knowledge of contemporary diplomatic practices to key international issues.
3. Apply major theories (Western and non-Western) in conflict management, prevention, and resolution.
4. Analyze policy and strategy debates and issues related to defense, development, and diplomacy in post-conflict reconstruction.
5. Construct diplomacy and conflict resolution explanations, theories of causation, and strategies for postwar rebuilding, development, and reconciliations.

Students explore how international law affects the relationships between states, and as such, is used as both a language of diplomacy and contest. Students study international law as a framework to analyze international issues and disputes—including economic, political, and security issues—with an emphasis on problem-solving and policy development. Students also study how international organizations impact the practice of international cooperation and conflict, as well as maintain international peace and security. The learning goals of the field are obtained through course readings, class discussion, case studies, papers, reflective journals, presentations, and exams.

Students who complete the international law and organizations concentration will be able to:

They will learn about the nature of the expansion of the West and of the political international system, which arose in Europe in the beginning of the Modern Age. Students will study the Revolt against the West and its empires and the emergence of the future non-western global powers. They will acquire an understanding the nature of the post-western global order and the articulation between western and non-western powers. The field adopts the historical method and, therefore, the analysis of these themes is made through the study of modern political history. The field relies on course readings, class discussion, case studies, papers, presentations, reflective journals, and exams to achieve these learning goals.

Students who complete the history and international concentration will be able to:

FIRST-YEAR EXPERIENCE (FYE)

The first year of university is an exciting, yet often challenging time for students. Among many things, the First-Year Experience program at AUK is designed to help students transition to a university environment, while also introducing them to the value of a liberal arts education. The FYE program does this by requiring students to take two required courses (University 100 and University 110), and by involving them in extra-curricular activities on campus. By the end of the program, through both didactic and experiential learning, students will have acquired a range of academic, personal, and social skills including developing an appreciation of a liberal arts education, acquiring vital higher-level thinking skills, and ultimately attaining a sense of personal empowerment and academic self-efficacy.

MISSION STATEMENT

The First-Year Experience strives to integrate all first-year students into the University's liberal arts environment by empowering them with essential academic, personal, and social skills. Students learn through holistic and experiential methods that encourage self-assessment and reflection. Ultimately, students in the FYE program are encouraged to become empathetic leaders and active agents of change within their communities.

VALUES

FYE core values:

- Individual involvement in academic, social, and personal development.
- Holistic development.
- Collaboration and teamwork.
- Creating a safe, constructive, and stimulating campus-wide environment.
- Active and experimental learning.
- Integrity, empathy, and responsiveness.
- Professional growth and development.
- Community service.

VISION

The FYE program hopes to add more campus-wide programs as well as work in partnership with other departments and campus organizations. We aim to develop more community-based opportunities for students to apply interdisciplinary course concepts. By offering more professional development opportunities in the future, we aspire to inspire faculty and staff to promote campus-wide learning.

LEARNING OUTCOMES

Upon successful completion of this course, the student will be able to:

- 1. Develop an understanding and an appreciation for the meaning, purpose, and benefits of a Liberal Arts education and demonstrate this by being self-directed, productive students, and members within their community.
- 2. Apply a variety of transferable, durable skills needed for success at university level and beyond. Skills include goal setting, note-taking, test-taking, reading, writing, listening, and presenting.
- 3. Critically question and analyze their own physical, emotional, and social behavior to demonstrate awareness between academic well-being and personal choices.
- 4. Integrate into the AUK liberal arts culture by attending and actively participating in a variety of co-curricular events and indicate this through reflecting on and summarizing their experiences.
- 5. Identify and apply practical strategies for higher level thinking by successfully completing a variety of class assignments and assessments such as: reflections, exams, projects, and presentations.
- 6. Examine and construct self-reflective practices and employ effective behavioral strategies conducive to learning and becoming an effective member of the University community.
